TECHNICAL SPECIFICATIONS

HERBII

Francis No. 7

The Francis Collection epitomizes a refined Modernist sensibility, blending the understated elegance of Jean-Michel Frank's parchment partitions with the artisanal precision of Eileen Gray's hand-lacquered folding screens. This body of work engages in a subtle dialogue with Modernism, interweaving elements of Japonisme and Orientalism. Each piece is crafted with meticulous care, achieving a restrained elegance through the deliberate use of cream and tobacco brown glass, which lends depth and creates a nuanced interplay of light and volume. As a cohesive collection, it invites thoughtful examination of its compositional integrity, material authenticity, and spatial resonance.
